Subject: SRSP-506, Draft Issue 3

Dear Josette Gallant,

In February 2024, the Department requested that RABC review the first draft issue of Standard Radio System Plan (SRSP)-506, – *Technical Requirements for Land Mobile and Fixed Radio Services, Including Broadband Systems, Operating in the Bands 896-901 MHz and 935-940 MHz*. The Board assigned the review of the standard to the Spectrum Management Innovation Committee.

The Committee held two meeting to review the proposed changes to the standard, during which feedback was provided to the Department. Final comments of the Board are attached to this letter.

In addition, at the request of the Department, RABC posted the draft standard on its website to facilitate comments from Canada's World Trade Organization (WTO) partners. No comments were received.

The Board has now completed its review. We appreciate having had the opportunity to review the updated standard.

Sincerely,

J. David Farnes
General Manager
